Lethbridge "Sweeties" in Third Place

THE CROWS' NEST PASS HOCKEY LEAGUE

League Standing February 3rd, 1921

Team	Played	Won	Lost	For	Against	Prcnt
Coleman	9	7	2	43	25	77.7
Blairmore	8	6	2	49	17	75.0
Lethbridge	8	5	3	49	37	62.5
Taber	7	3	4	24	37	42.9
Macleod	7	1	6	26	48	14.3
Pincher	7	1	6	25	52	14.3

P.S.—The game played between Lethbridge and Blairmore, on Wednesday, February 2nd, is mentioned in the above report as a win for Lethbridge, but as this game was postponed and is very likely to be conceded to Blairmore as a win, in accordance with the rules and regulations of the Amateur Athletic Association, Lethbridge will again appear at the top with 7 games won and 0 losses lost.

The league hockey game at Lethbridge on Wednesday night resulted in a win for Lethbridge after the hardest fight the team and fans of that city have ever had to put up. In the early stages of the game it was practically nobody's and the first period ended without a score. The second period was equally hard, but both teams managed to find their way into the other's net and the game was still a tie. About twelve minutes of the final period was played, mostly on Lethbridge territory, before a second goal was recorded in Lethbridge favor, followed shortly afterwards by a tally, from Blair more that was not recorded because of having crossed the notice of the referee. But this was plainly noticed by anyone watching the game from the corner.

Lethbridge had nothing whatever to boast of in winning this game. Both teams, naturally, were out to win, but the real sporting spirit was displayed by Blairmore, who appeared for the fray with exactly the same lineup and the same two-only subs as they presented at their opening game of the season. On the other hand, Lethbridge were confident of losing the game with their original lineup and in order to "put it over" the Pass team and possibly win, went so far as to make several changes in their lineup, adding two new men, one at least of whom could not qualify for amateur playing. Besides three subs were used. These were changing off with players every few minutes thus preserving their men all through. Blairmore's subs were not used, except to replace a man knocked out or disabled, and then in the third period Blairmore boys, after holding their ground without relief, skated all over the Lethbridge players and had the best of it.

Considerable dissatisfaction met the visiting team at the start, they finding that, although accommodation had been promised the visiting fans, their reservations were packed by selfish citizens of Lethbridge while the visitors were being handled by police outside the gates.

The meanest reception ever accorded a visiting people was handed out by Lethbridge on Wednesday in connection with the visit of the visiting fans, their reservations were packed by selfish citizens of Lethbridge while the visitors were being handled by police outside the gates.

Considerable of dissatisfaction met the visiting team at the start, they finding that, although accommodation had been promised the visiting fans, their reservations were packed by selfish citizens of Lethbridge while the visitors were being handled by police outside the gates.

The meanest reception ever accorded a visiting people was handed out by Lethbridge on Wednesday in connection with the visit of the sporting element of the Crows' Nest Pass. The fact that police were stationed at practically every angle of the grounds led us to believe that they had looked forward to having to encounter a riot of savages rather than great people heart and soul of the best sporting blood the province can produce. Lethbridge people crowded every available space from which the game could be seen, and such re-

marks were common as "to hell with them; let them go back where they came from!" Pass rooters were in the awkward position of not being able to root. They were separated and in groups of twos and threes were located amongst groups of Lethbridge people who made no bones about handing out insults in return for an occasional boot for the visiting team.

Considerable complaints made regarding the gink, accommodation, lighting, size, etc., were justified. The lights were not what they should be. The rink was not swept off from beginning to end of the game, in spite of the fact that the captain of the Blairmore team raised the services of his men to clean the ice if Lethbridge could provide the shovels.

In spite of the treatment handed out by Lethbridge, we know that if Lethbridge was to play on the local rink tomorrow they would be greeted by entirely different conditions, and everything that could be desired would be done to make the team and rooters feel at home.

The best sporting spirit ever displayed in Southern Alberta prompted the people of The Pass to support their team. The trip to Lethbridge, with the money spent in that city in the course of a few hours, represented over four thousand dollars, ninety per cent of which was put up by our little community of about two thousand people—a bigger outlay than Lethbridge with its boastful population of fourteen thousand people have ever been able to muster for such an occasion.

Considerable rough play took place during the game, and men of both teams suffered somewhat. The Lethbridge team, forgetting all sport, laid low for Barbour, Turner and Vejprava, and succeeded after many attempts to get the former, and as a result it will be a few weeks, and perhaps not again this season, that Barbour will be able to take his position with the team suffering from a very severe injury to one of his knees.

Word now comes from Lethbridge that Grant has an amateur card, declared o.k. by Judge Jackson and President Long, of the Hockey League, and that President Long has thrown out the Blairmore protest. President Long was not so prompt in acting on the protest entered by Coleman, because his ruling would have been against his home town team. President Long is a Lethbridge citizen and should have left the matter to be considered by the league executive. Judge Jackson is a Lethbridge citizen, and anyone watching the game on Wednesday night could see that the referee was a Lethbridge citizen and an important

factor in Lethbridge's out-to-win scheme.

The C.P.R. are to be commended for the splendid train placed at the disposal of the Passes. The train was local through and through, making the excursionists feel all the more at home, and officials of the Company accompanied the excursionists to and from Lethbridge, seeing that nothing was lacking in the way of accommodation.

The going trip started from Coleman at 3:15, and arrived at Lethbridge at seven o'clock with about three hundred people. Not a handshake greeted the visitors at Lethbridge, and the Blairmore band, taking for granted that the keys of the city were in charge of Captain Barbour, led the procession to the scene of execution.

The return trip started at midnight, the height of jollity prevailed for the whole three and a half hours of the journey home. Everyone were in good spirits, apparently glad that they were away towards a district worth living in. On arrival in Blairmore, they were not greeted by police armed to the teeth with gun and baton, but by law-abiding and law-preserving citizens, and they were not greeted with the remark from a plain clothes officer of the law that his men should "hit them on the head with the revolver."

A dance will be held in the Union hall at Hillcrest on the night of February the 14th, under the auspices of Hillcrest Loc 1 Union 1058, U.M.W. of A. Miller's orchestra will be in attendance.

Governments as Business Concerns

In any serious consideration of the responsibilities, duties and functions of Government in a country like Canada employing a representative system of Parliamentary Government, the fact needs to be kept in mind that changing times bring new responsibilities and duties and necessitate the adoption of new methods. New inventions create new conditions, and these must be met by Government as well as by people engaged in trade and commerce.

Within the half century since the British possessions in North America became federated as a Dominion, the whole world has become centralized to an extent undreamed of in the middle of the Nineteenth century. When the Fathers of Confederation drafted the constitution of the new Dominion, to be there was only one public service of a distinctly business character which it was specifically provided should be the duty of the Government to undertake and manage, namely, the postal service. Powers were, however, conferred on Parliament of an extensive character, thus enabling the people through their representatives to embark on almost any business undertaking which might be considered in the national interest.

One of the stipulations made by Nova Scotia and New Brunswick in agreeing to enter Confederation was that a railway should be built connecting them with the other Provinces of Canada. The construction of the Intercolonial Railway was, therefore, undertaken by the Dominion Government as a Government undertaking. It was, however, more political than commercial in character; nevertheless in this way the Government did almost at once engage in a large business enterprise.

For many years the management of the postal service and the Intercolonial Railway constituted the only really business enterprises conducted under direct Government management. When British Columbia agreed to enter Confederation, the construction of a railway across Canada to the Pacific Coast was provided for, and this was commenced as a Government-owned road. It was very soon abandoned and a contract awarded to the C.P.R., and it was not until the National Transcontinental and Grand Trunk Pacific project was launched that any concrete step was taken to enlarge the scope of Government ownership of railways by Canada; and even in connection with that project it was not the intention to engage in Government operation.

Force of circumstances, and the eruption of the Great War, operated, however, to compel the Government of Canada to engage in railway ownership and management on a large scale. And conditions created during the war, coupled with the necessity of operating a huge railway system, have resulted in the Federal Government engaging in other large commercial undertakings.

It is not so many years ago that the C.P.R. was the largest single railway corporation in the world, with the greatest railway mileage under one management, but also owning and operating lines of steamships to all parts of the world, express services, telegraphs, hotels and conducting many allied businesses. With the amalgamation of the Intercolonial, National Transcontinental, Canadian Northern, Grand Trunk and Grand Trunk Pacific Railways into one Government-owned system, the Canadian National Railways today boast of a greater mileage than the C.P.R. Along with the railway, the Government owns and operates telegraphs, express, hotels, elevators and ships.

The next development was the establishment of the Canadian Government Merchant Marine, and as a result scores of Canadian Government-owned vessels are operating from Canadian ports to all parts of the world.

Whether Government ownership and operation of railways and steamship services in Canada will prove a financial success remains to be seen. Government railways have long existed in Germany, Russia and other European countries, but political and military reasons were the prime factor back of these Government enterprises. The exigencies of the Great War forced Government operation of railways in both Great Britain and the United States, but in neither case could the experiment be described as financially successful, and with the ending of the war, the railways were returned to private management.

During the war, too, the United States entered upon a Government ship-owning policy, just as Canada did, but whereas the United States is not continuing that policy, the Dominion is persisting in it and adding to the number of its vessels in operation. While other countries have subsidized steamship companies, and have been and are partners in such companies, Canada is developing an out-and-out Government-owned and managed mercantile service.

It will be seen, therefore, that the Government of Canada is now a huge business concern, as well as a political organization entrusted with legislative and administrative powers for the order and good government of the Dominion. It is engaged in what is probably the greatest experiment along these lines ever attempted by the Government of any democratic country. The outcome may well be watched with the keenest interest by the Canadian people as it may either make or break the Dominion.

In next week's article some business undertakings by Provincial Governments will be considered.

Many Operations

Are Unnecessary

Ex-Mayor of Kitchener Would Nationalize Physicians

That about 50 per cent of the operations now being performed by the medical profession are unnecessary was a statement made by Dr. Heit, ex-mayor of Kitchener, in an address at Welland on the nationalization of the medical profession. He advocated that doctors should be under government salary and the people educated by a system of lectures to a standard of healthful living.

There are some astrologers in China, but not many, as astrology is a very perilous profession. When one of these so-called prophets predicts an event which does not occur he loses his head.

Agricultural Survey.

The Manitoba Government is commencing a comprehensive agricultural survey of the province for the purpose of ascertaining reasons and treatments for unproductive agricultural lands in the province, and also to provide data for immigration purposes. The survey will be conducted by a series of meetings and farmers will be asked to give evidences of their experiences, their difficulties and problems, and wherever possible advice will be given right away by experts who will be in attendance at each meeting.

Construction in Western Canada.

The value of actual construction work in Western Canada during the past year totalled \$71,183,100, as compared with \$28,619,100 in 1919 and \$19,634,900 in 1918.

New Market For Alberta Coal at Coast

The next few months will likely see the opening up of a new market for Central Alberta coal mines. This market is the North Pacific coast towns, a market which has never been systematically developed, but which offers unlimited possibilities. A potential outlet for coal of considerable importance exists on the coast, particularly in the bunkering of the smaller steamboats and trawlers that ply along the coast, and in the fuel needs of the industries of Northern British Columbia. The development of this market would require the provision of storage facilities at Prince Rupert, since at present there is no accommodation adequate to the storage of large shipments of coal from Alberta.

Is Your Nose Plugged? Have You Catarrh?

If Subject to Colds, Here is
Real Good Advice.

Don't load your stomach with enough syrup. Send handkerchiefs through the nostrils—send them to the passages that are subject to colds and catarrh. Easy to do this with Catarrhozone, which cures a host of ills.

Even though you have a cold, hold the heating vapor of Catarrhozone all through the bronchial tubes, nostrils and air passages—everywhere the nose and throat are.

Catarrhozone follows you. You'll not have colds, nor will you suffer from sniffles, bronchitis, or throat trouble if Catarrhozone is used.

Get in touch with your dealer.

Followings are some excellent recipes. If you do not wish to try the whole recipe, take one-half or one-fourth of each ingredient called for.

All measurements should be taken level.

Plain White Cake.

One-half cup butter, one cup sugar, two cups flour, three level teaspoons of baking powder, three egg whites, two-thirds cup milk (about), one-half teaspoon flavoring extract;

Cream the butter. Add the sugar gradually. Sift the flour with the baking powder three times. To the creamed butter and flour, add a little flour, then a little milk and so on alternately until all the flour is used and the mixture is a drop batter. The amount of milk required varies with the kind of flour used. Add flavoring. Fold in the stiffly-beaten egg whites and bake the batter either in two layer pans or in a loaf.

Caramel Icing.

Cook two and one-half cups light brown sugar with one and one-quarter cups of evaporated milk. When it forms a soft ball when tried in cold water, add one tablespoon butter and one teaspoon vanilla extract.

The PLAIN WHITE CAKE may be varied. Melted chocolate may be added to the mixture and a snow white frosting spread over the cake when it is baked. Or, the cake may be baked as a white cake and adorned with CHOCOLATE FUDGE FROSTING.

Chocolate Fudge Frosting.

Cook together, one cup granulated sugar, one cup light brown sugar, one cup milk, one-half cup melted chocolate and three tablespoons cream until it forms a soft ball when tried in cold water. Add one tablespoon butter and one teaspoon of vanilla extract.

Remove from the fire and beat until of the right consistency to spread, taking care to stop the beating just as soon as the mixture seems thick.

To many men make strenuous efforts to get a liberal share of something that doesn't belong to them.

Minard's Liniment For Distemper.

To Study Forestry Work.

The Quebec Government has recently sent four of the employees of the Provincial Forest Service—graduates of the Forest School of Laval University—to Europe to spend a period of six months in making advanced studies of forest practice and utilization in France, Belgium, Switzerland and Germany. Particular attention will be paid to saw-milling, silvicultural practice, reforestation, aerial photography, forest research, wood technology and wood utilization, including the development of markets for hardwood species through wood-using industries.

Millions to Farmers.

Farmers in Western Canada have already received over \$200,000,000 for their 1920 wheat crop.

How to Make Good Cake

BY LORETTA C. LYNCH
An Acknowledged Expert in All Matters Pertaining to Household Management.

No matter whether a woman ever bakes anything else it is her ambition to be able to make a good cake. The aim of this article is to simplify the art of cake making so that the average housewife can be successful.

In the first place know that you have a good oven. If you use a coal stove arrange to do your baking at the beginning of the day. If you have an oil-heated oven arrange to have it hot when the cake is ready. City dwellers have frequent failures because of their gas ranges. In many apartments the ranges are the property of the gas company, and, having been used by former tenants, are sometimes badly in need of repair.

Then there are certain implements required to make the making of a cake a pleasure rather than a task. Two mixing bowls, a smaller bowl for beating eggs, a standard half-pint measuring cup, a tablespoon, a tea-spoon, a palette knife or spatula, a Dover egg beater, a whisk egg beater, a sifter, a wooden paddle or spoon and baking pans.

Before beginning to make a cake see that you have all the ingredients on hand that the recipe calls for. By measuring the dry ingredients first, then the liquid, and lastly the fat (shortening), the same cup may be used.

Flour, sugar, spices and any other dry ingredients should be sifted BEFORE it is measured. Shortening should be soft enough to round up easily on the spoon. Butter or any other shortening that is very hard, may be softened to the proper consistency by leaving it in a warm room for a short time or by adding to the approximate quantity a tablespoon of boiling water before measuring. The shortening should not be melted unless your recipe specifically directs that it be melted.

Following are some excellent recipes. If you do not wish to try the whole recipe, take one-half or one-fourth of each ingredient called for.

All measurements should be taken level.

Plain White Cake.

One-half cup butter, one cup sugar, two cups flour, three level teaspoons of baking powder, three egg whites, two-thirds cup milk (about), one-half teaspoon flavoring extract;

Cream the butter. Add the sugar gradually. Sift the flour with the baking powder three times. To the creamed butter and flour, add a little flour, then a little milk and so on alternately until all the flour is used and the mixture is a drop batter. The amount of milk required varies with the kind of flour used. Add flavoring. Fold in the stiffly-beaten egg whites and bake the batter either in two layer pans or in a loaf.

Caramel Icing.

Cook two and one-half cups light brown sugar with one and one-quarter cups of evaporated milk. When it forms a soft ball when tried in cold water, add one tablespoon butter and one teaspoon vanilla extract.

The PLAIN WHITE CAKE may be varied. Melted chocolate may be added to the mixture and a snow white frosting spread over the cake when it is baked. Or, the cake may be baked as a white cake and adorned with CHOCOLATE FUDGE FROSTING.

Chocolate Fudge Frosting.

Cook together, one cup granulated sugar, one cup light brown sugar, one cup milk, one-half cup melted chocolate and three tablespoons cream until it forms a soft ball when tried in cold water. Add one tablespoon butter and one teaspoon of vanilla extract.

Remove from the fire and beat until of the right consistency to spread, taking care to stop the beating just as soon as the mixture seems thick.

To many men make strenuous efforts to get a liberal share of something that doesn't belong to them.

Minard's Liniment For Distemper.

To Study Forestry Work.

Saskatchewan's Wheat Average Smaller

Is Now Placed at 113,155,274 Bushels

By Final Report.
A total of 113,155,274 bushels of wheat were produced in Saskatchewan during 1920 according to the final crop statement issued by the statistics branch of the department of agriculture. This is an increase of 23,141,589 bushels on the 1919 figures.

The crop was below the average and not nearly as good as expected prior to harvest, the yield averaging 11.2 bushels an acre as compared with the estimate of 14.5 bushels. In 1919 the yield was 8.5 bushels an acre. The yield was materially reduced by the dry hot weather in July. The average under cultivation for wheat was 10,061,069 as compared with 10,573,363 acres in the previous year.

The prospects for next season are brighter than they have been at this period for several years. The land is in better condition than it has been for years owing to heavy rains during the fall. The rainfall was the best since 1915 when the province had a record year.

Quite Right.
Hubby.—What kind of chops are these, veal or pork?
Wifey.—Can't you tell by the taste?
Hubby.—No.
Wifey.—Then how can it make any difference?

WINTER WEATHER HARD ON LITTLE ONES

Our Canadian winters are exceedingly hard on the health of little ones. The weather is often so severe that the mother cannot get the baby out for an airing. The consequence is that baby is confined to overheated, badly ventilated rooms; takes colds easily; crosses his legs; is peevish. Baby's Own Tablets should be given to help the little one healthy. They are a mild laxative which regulate the stomach and bowels and thus prevent colic. The Tablets are sold by medical dealers at 25 cents a box from Dr. William McDonald Co., Brockville, Ont.

Ford Co. Paying Bonuses

Line of Waiting Men Extended Four Blocks.

Payments of eight million dollars to the 77,000 employees of the Ford Motor Company has begun. The money is a bonus and each was handed an average of \$12 as his portion.

When the paymaster's wicket opened at 10 o'clock there was a line extending for four blocks in either direction, with hundreds of mothers who crowded out into the middle of the street. Twenty policemen and a score of special officers kept the men in line. It was after dark when payments ceased for the day.

It is estimated that working at top speed it will require about five weeks' steady paying out of money to get rid of \$8,000,000. About \$250,000 was paid out in eight hours.

For Burns and Scalds.—Dr. Thomas' Electric Oil will take the fire out of a burn or scald. It should be applied while the skin is still red. It may be available at any time. There is no preparation required. Just apply the oil to the burn or scald and the pain will abate and in a short time cease altogether.

The Dead Seal will be a solid mass of coarse and dirty salt within the next 500 years, according to an eminent geologist, who has been making a study of that peculiar body of water.

For Frost Bites and Chilblains.—Chilblains come from undue exposure to cold, and if allowed to continue the tiny vessels of the skin die. The treatment of either an excellent preparation is Dr. Thomas' Electric Oil, as it counteracts the inflammation and relieves the pain. The action of the oil is prompt and its application is extremely simple.

Austria has a law requiring every employer to retain as many workmen on his books as he had before the war.

To a lover there are but two places in the world—one where his sweetheart is and the other where she isn't.

Imperial Mica Asbestos and Imperial Eureka Harness Grease lessen the strain on wagon, team and harness. They make heavy hauling safe and easy.

The mica in Imperial Mica Asbestos forms a smooth heat-resisting coat on axle and hub. Over this the greases work easily and will not melt. Imperial Mica Asbestos Grease goes twice as far as ordinary greases.

Imperial Eureka Harness Oil keeps harness soft, flexible and strong. It protects leather from water and dust, and resists cracking. It is easily applied and quickly saves its small cost in harness and repairs. It improves the appearance of any leather covered leather and keeps it in good condition.

When Grandmother Was a Girl

HOO skirts were worn by those who first asked the druggist for, and insisted on having the genuine Golden Medical Discovery put up by Dr. Pierce over 50 years ago. Dress has changed very much since then. But Dr. Pierce's medicines contain the same dependable ingredients. They are standard today just as they were fifty years ago and never contained alcohol.

Dr. Pierce's Golden Medical Discovery for the stomach and blood cannot be surpassed by any tonic and alterative today.

When you feel "all out of sorts" —your vitality at a low ebb—the blood becomes surcharged with poisons! The best tonic is called Dr. Pierce's Golden Medical Discovery. Dr. Pierce manufactured this "Discovery" from roots and bark without alcohol—a corrective remedy, the ingredients of which nature put in the fields and forests for keeping us healthy. It puts vim, vigor, vitality into the blood. Try it! All druggists.

Send 10c to Dr. Pierce's Bridgeburg, Ont. Laboratory for trial pug.

Long Telephone Call

Conversation Over 5,000 Miles of Wire at \$16.25 for 3 Minutes. "Connect me with Number Blank, Vancouver."

For the first time in the history of the Ottawa Bell telephone service, the above call came in to a long distance operator a couple of nights ago. The call was placed through Ottawa, New York, Chicago, Denver, Salt Lake City, San Francisco, Seattle, and then to Vancouver, a distance of considerably over 5,000 miles. Voices could be heard distinctly at both ends.

The call cost \$16.25 for three minutes.

It cost \$16.25 for 30 minutes. Welfare Station Tolls will come in 30 minutes, scales, scales, or what is known as "itch," Mangy, Prairie Scratches, Texas itch, Seven Mile Disease, and various other diseases. Sold by druggists.

Lots of British Isles. People speak of the British Isles and usually think of them as three in number. But, counting them all, large and small, it is said that the islands comprised in the United Kingdom number about 5,500—Toronto Star.

LESSON THE STRAIN

Imperial Mica Asbestos and Imperial Eureka Harness Grease lessens the strain on wagon, team and harness. They make heavy hauling safe and easy.

The mica in Imperial Mica Asbestos forms a smooth heat-resisting coat on axle and hub. Over this the greases work easily and quickly saves its small cost in harness and repairs. It improves the appearance of any leather covered leather and keeps it in good condition.

A Winter's Trapping MY FIRST SILVER FOX

By O-GE-MAS-ES (Little Clerk).

(Copyrighted)

(Continued)

Skin currency, or made beaver currency, which was the Hudson's Bay Co. term, was invented by the Company for the convenience of trading with the Indians. A prime beaver was the standard, and rated at a skin. Then ten muskrats were one skin, a red fox one skin, a cross fox from two to five skins or more, a beaver from five to ten skins and so on. Then all articles in the trading store were priced in skins, always bearing in mind one of the strict rules of the Company, that essential articles such as blankets, ammunition, clothing, etc., etc., were moderate in price, while beads, fancy shawls and belts, colored silks, were high in price. Generally when an unopposed Indian came in with some furs, these were counted and valued by the clerk. We will say they came to forty skins, then forty goose-quills were handed the Indian. He would think some time, then divide them up, such as five quills (representing five skins) for a blanket, four for ammunition, and so on. If you hurried him probably the whole business would have to be gone over again, as some important items would have been forgotten. So now the skins were trading very dear to the heart of the older Indians, for it was an inviolable rule that both before and after trading a small quantity, generally of tea and tobacco, was handed to him. With the introduction of the present currency system, or money way as is styled in the north, all gratuities were cut out and the Indians resented this extremely.

To return to fox trapping. I had told the story in detail of my successful capture of a silver fox in many a camp, and on describing the small and well shaped tracks I had noticed, this the Indians said was characteristic of the better breed foxes. That is the cross silver or black, while the ordinary red fox had a larger, bushier feature. I told them they were generally found in pairs, so I was terribly keen to catch another. I had chosen my trapping grounds so as not to interfere with anyone, and except in one instance, which I am going to relate, never tracked a man all winter.

I had several fox traps set at the mouth of the Sturgeon River where it ran into a marshy lake, some nine miles from the post, and on going down to see these with my dog train, found one trap gone evidently some days before, as I circled a number of times before I could pick up the track. I tied my dogs up, took off my cap and settled down for a heavy snow-shoe tramp as the snow was quite deep, and held up by tangled grass and brush. Following the track carefully, about I would say some five days old, I at last came to Mr. Fox's first camp, a nice circular bed in the grass, with four rabbit feet in it, so evidently trap and all on his foot, Reynard had not starved. On carefully examining his bed I detected several long black hairs, this, as you may imagine, fired my footsteps and on I went at a hard pace for the

-

thought of another silver fox was too good to be true.

I passed four more of his camps in several of which were more rabbit remains, and at last caught sight of my lord's wearily dragging the heavy trap and evidently about played out, as his tongue was out, and no doubt he knew he was hunted. To my amazement and disgust, he was as dead as a door nail after trapping him. I skinned and looked him over. Found his tail was full of black hairs. Well I was very hungry, soothed with sweat and generally mad at the result, so had to find my dogs and get dinner as soon as possible. Fortunately I found we had been travelling in a circle, so in a short time I reached my sleigh and was looking for a place to boil my kettle, when I caught sight of a smoke, very faint, some half a mile to the north. Tying my dogs again I made for it, and approaching the spot very cautiously, noted an Indian boiling his kettle, while beside him were two small dogs and a sleigh. My suspicions were excited. What was he doing here, and striding up I asked him. His reply was evasive and he seemed very unhappy at my appearance. Noticing something bulky on his sled, I kicked the wrapper open, and lo and behold, here was the mate of my silver fox. I at once told him he had stolen it, for the villain had set a trap within a few yards of one mine. He evidently knew he had a poor case, for in a ringing tone he said, "Oh, you can take it, but what will the Big Boss say, as I am heavy in debt to the company." I was in quandary, for as a rule clerks are not supposed to trap furs, and after some consideration I threw the fox at him and with all the bad Indian terms I had acquired, abused him, his ancestors and posterity to the third and fourth generation, until he fairly cowered in the snow, holding his dirty hand to his ears. Alas for civilization, he was a Christianized Indian, from Cumberland Lake, a good downright fellow, however he does not talk. Well, it had been a poor day and I was too angry to wait for dinner, so home I went, with my silver fox turned to a red one; the mate of my fine fox stolen, no dinner, etc. Finally spring came and I made a glorious beaver hunt which I have described in another article. My total fur hunt for the winter ran about like this:

Canada's Maple Products

The manufacture of sugar and syrup from the sap of the sugar maple is an important industry in the Eastern provinces of Canada and particularly in Quebec. Long before the white man settled the country, maple syrup was known to the aborigines and apart from wild honey was the only intensely sweet product at their command. The methods of procuring it were naturally of a very crude description. Modern methods have greatly improved the product and have led to an ever-increasing demand. Quebec province is the centre of it in industry. Of the 20,000,000 pounds, or more, of maple products produced in Canada, more than three-fourths have been credited to Quebec. Ontario is officially reported to be responsible for six million pounds and the Maritime Provinces for half a million pounds only. The other provinces of Canada do not figure in the calculations. These facts are gathered from a timely pamphlet just issued by the Department of Agriculture at Ottawa, of which J. B. Spencer, Director of Publicity, is the author. From this well-illustrated and technically detailed publication it is also learned that the production of maple sugar, and its equivalent in syrups, of late years has shown a tendency to decrease. From 1851 to 1861 we are told the average yearly production was about 13,500,000 pounds, or, from 1861 to 1871 to 18,000,000 pounds, and from 1871 to 1881 19,000,000 pounds, and from 1881 to 1891 21,500,000 pounds. The latter was the pinnacle of annual production, for in the next decade the average per year was 21,200,000 pounds, and in later years the average has been little less than 20,000,000 pounds. It is thought that perhaps with the increase in price that has taken place recently greater production may be looked for. It is estimated that the value of the yearly manufacture of sugar and syrup is \$2,000,000, and that 50,000 people are employed in the industry at the height of the season, which is of very short duration, extending from April to May or six weeks at most. Stringent laws against the adulteration of the product have been passed, especially in Quebec, where schools of instruction have been established and the Pure Maple Sugar Co-operative Agricultural Association has been organized.

Amateur Boxing Championship

The military amateur boxing and wrestling association with the sanction of the amateur athletic union of Canada is holding boxing contests to decide the amateur championships for the Province of Alberta. These contests are being held at the Calgary armories on the following dates:

Qualifying contests on Monday and Tuesday, February 11th and 12th.

Semi-final and final contests at 8 p.m. on Wednesday, February the 23rd.

Contests will be held in the following classes: Bananas weight, 116 pounds and under; leather weight, 128 pounds and under; light weight, 140 pounds and under; welter weight, 148 pounds and under; middle weight, 158 pounds and under; heavy weight, any weight. Weight will be ring side weights, and will be rigidly adhered to. Anyone who fails to make the weight of his class will be debarred.

Contests are open to all amateurs in the province. Each contestant must be in possession of an amateur card and a medical certificate to the effect that he is fit to enter competitions. Entries must reach the secretary no later than February the 16th.

Contests will be held under army and navy rules.

Any other information the secretary, Major W. S. Lawrence, R. C. E., Calgary, will be pleased to furnish.

The association will guarantee the return railway fare of all those from points in the province outside of Calgary who reach the finale in the contests. In no case will more than the sum of \$15.00 be paid to any contestant for railway expenses.

A good hockey game was witnessed at the Coleman rink on Tuesday night, when Pincher Creek was defeated by Coleman to the tune of 5 to 3. About two hundred rooters were present for Coleman and it is believed that had Pincher been favored with a little encouragement occasionally the results would have been considerably different.

Reports come of another revolution in Ireland and D. M. Conway, of Blairmore, reports the advent on Sinn Fein soil, of a new daughter.

UNION BANK OF CANADA

56th ANNUAL STATEMENT—30th NOVEMBER, 1920

Fifty-sixth Statement Reveals Very Strong Cash Position Built Up During Past Year—Total Assets Increased \$60,000,000 Since 1916—Savings Deposits Again Show Marked Increase—Quick Assets to Liabilities Increased From 47.23 to 64.35—There Are Now 393 Branches and Agencies.

To fill the vacancies on the Board, Messrs. G. M. Black and D. N. Finnie, of Winnipeg, have been elected Directors.

JOHN GALT, President.

The President, Mr. JOHN GALT, in the chair.

DIRECTORS' REPORT

The Directors have pleasure in presenting their report, showing the result of the business of the Bank for the year ended November 30th, 1920.

During the year 15 branches and agencies were opened, and 10 were closed, as follows:

OFFICES OPENED

Province of Ontario, 5—Gatineau, Mansfield, Minden, Oshawa, St. Anna's, Terrebonne, Waterloo and Dunnville.

Province of Saskatchewan, 1—Brooks, Carmel, Moose Jaw, Pinkham, Saskatoon, etc.—Calgary (Steel Yards), Edmonton (Steel Yards).

OFFICES CLOSED

Province of Manitoba, 5—Grayside, Homewood, Margaret Roseire, Winkler.

Province of Saskatchewan, 2—Hay River, Saskatchewan.

Province of Alberta, 1—Airdrie, Grey Lake, Loyalist.

The number of branches and agencies in operation at the close of business on November 30th was 393.

The number of employees at close of business on November 30th was 2,203.

The usual inspection of all branches and agencies has been made in accordance with an announcement made by him at the Annual Meeting, Mr. H. T. Riley, Vice-President of the Bank, has recently resigned from the Board, to devote more time to his own affairs, and Mr. W. R. Allan has been elected Vice-President to succeed him.

Transferred to Past Account.

Written off Bank Premiums, etc., and Pension Fund Contribution to Sick Benefit Fund.

War Tax on Bank Note Circulation to 30th November, 1920.

Balance of Profits carried forward.

PROFIT AND LOSS ACCOUNT

Balance at credit of account, 31st November, 1919, \$108,222.87.

Net profits, or loss for the year, excluding expense of management, interest due on deposits, rents, taxes, insurance, etc., and making provision for bad and doubtful debts, and for rebate under discount, have amounted to \$1,000,000.00.

\$1,000,000.00

Department of Agriculture for Alberta

In view of the present demand for breeding sows the Department of Agriculture has arranged with the Live Stock Exchange at Edmonton and Calgary to select the best young sows from those coming to the Stock Yards. The sows may be sold or returned directly to the Secretary of the Edmonton Live Stock Exchange, Ltd., Stock Yards, Edmonton, or to the Secretary of the Calgary Live Stock Exchange, Alberta Stock Yards, Calgary. A deposit of Fifteen Dollars (\$15.00) should accompany the order for the sow. The Department of Agriculture will have a representative at the Yards to assist in the selection of the sows.

Cowley Happenings

Born, to Mr. and Mrs. Nap Cy.,
a daughter.

Miss Blanche Fortier is at
present visiting her sister in Gran-
brook.

K. M. Johnson is the only
school trustee from this district in
attendance at the School Trustees'
Convention now in session at Cal-
gary.

The concert held in Tustian's
hall on Wednesday evening, by
the Women's Institute, was a suc-
cess, there being a large crowd
present. Features of the evening's
entertainment included costum-
ed dances by Charles McKerrel, Scot-
tish champion highland dancer
who delighted the audience with his
clever footwork in the highland
fling and sailor's hornpipe. Miss
Smith, of Lethbridge, gold-medal
elocutionist, gave several pleasing
selections, being a very versatile
entertainer. Vocal and instru-
mental selections by local people
completed the evening's entertain-
ment.

13. ALFRED MCKAY—Composition 75,
geometry 88, history 76, arithmetic 46,
grammar 90, spelling 64, geography 67.
Total 496.

14. THOMAS KEMP—Composition 74,
geometry 73, history 83, arithmetic 34,
grammar 87, spelling 62, geography 82.
Total 405.

15. JANETTE THIBODEAU—Composi-
tion 82, geometry 55, history 86, arith-
metic 53, grammar 96, spelling 20, geo-
graphy 90. Total 475.

16. JOHN PATTERSON—Composition 74,
geometry 40, history 64, arithmetic 36,
grammar 84, spelling 60, geography 83.
Total 441.

**How To Tell a
Turkey's Age**

"Casey," said Pat, "how do ye tell
the age of turkey?"

"Ye can always tell by the teeth,"
said Casey.

"By the teeth!" exclaimed Pat. "But
a turkey has no teeth."

"No," admitted Casey, "but I have."

Love of The Wild

ARCHIE P. McKISHNIE
Printed by Special Arrangement with Thos. Allen,
Toronto, Ont.

(Continued)

"Wall, I ain't sayin' as she knowed somethin' might happen you, this bein' Friday an' an' unlucky day, ner I ain't sayin' as she prevented that bullet from gettin' you. I ain't surprised at all, though. If it was me, I'd declare, I cle're Betsey's a witch, as she's commonly called. But, Boy, she fol'ed me, and I heard her say, 'I'm too weak for her to see the shoot'er, but we all know he wasn't a Bushwhacker.' Betsy stopped in to see the wife an' she ups 'n' tells about the turkey thief. When she done tellin' about the turkey thief, Rachel tells me, 'I goes an' tells Bill, an' me' an' him picks up Jim that on our way down here. That's all."

Boy glanced toward his father and a spasm of pain crossed his face.

"Suppose we change the subject," he suggested. "Bill, somebody has been fooling with my turkey traps."

"And mine, too," complained Paisley.

"Some thief is takin' the turkeys out of my traps. I'm goin' to see who done it, right soon."

"The birdie's been here, I tell him," said Jim. "I was landin' at Mud Pond after bein' out on the bay, an' he told me he's seen Tom once, but he didn't know what he was doin'."

"And mine, too," complained Paisley.

"Well, I wouldn't believe one of them Broadcrooks on 'call,'" said Peeler.

"They're all thin, they're all sickies. Not man among us here but has lost traps, and who stole 'em? I ask?" Why, Broadcrooks, for sure."

"Big McTavish looks me straight in the eye and says, 'I didn't stol' nothin' in,' he said.

"He's too honest for that. I don't want to hear anybody say anything against any of the Indians. They're honest. They're too fasten turkey stealing on to them innocent fellers. I'm goin' to break him in two. Remember that, and don't you let me see you again."

Paisley punched Boy.

"Fightin' spirit stirrin' already," he whispered. "Well, fellers," he said aloud, "suppose we be hittin' the back trail again?"

"The back trail?"

"Things are just at this point," said Bill, as he opened the door. "We can expect somethin' startin' right soon."

"Your paper open, Mac, and you, too, Bill, an' if you got time to shootin' you see that yours is done first."

"And, Mac," he whispered in McTavish's ear, "don't you tell Gloss out there he's holdin' very far—certainly not into the wood."

When the men had gone Big McTavish arose and, taking the pine needle brush from the door, whistled the shrill note for the camp fire. Then he stretched his long arms and looked at Boy with deep, awed eyes.

"Bunny," he said, letting his big hand rest on Boy's shoulders.

Bunny was an old baby name. He had not used it for years, but to-night used it—he couldn't have known why.

"Bumpy," he repeated, "don't you let 'em get you." At his bedroom door he looked back and said earnestly, "If you let 'em get you for first, don't you let 'em Bumpy."

As Boy arose to seek his bed in the attic the outer door opened and Bill McTavish stepped in. He made a sign for the men to follow him by the arm, drew him outside. There he spoke to him in low tones.

"Well, now," said Boy, after Paisley had concluded, "we ought to catch the turkey-thief that way all right, Bill."

"It just popped into my mind after I left Peeler and Declute at the Forks," said Boy, "but I guess some fellers who tried it in the Michigan woods, and it worked fine. And, Boy, he added, 'if the thief is who we expect, we'll never give him a scare!'

"Now then, remember, we'll catch the thief right now!" he dropped in on me early."

With a nod Boy into the house and softly closed the door. Boy removed his moccasins and as he placed them before the fireplace he turned quickly. The swirl of a dress had stopped him, and he saw his sweet Gloss, her long hair down to her waist, her cheeks wet with burning. As he gazed upon her wonderfully, her lips trembled.

"You're all—talkin'!" she confessed. "I didn't mean to listen, but Bill speaks so loud I couldn't help hearing. You were shot at, and, oh, Boy you didn't tell me."

Boy's pulse was throbbing.

"Why, Gloss," he stammered, "it wasn't really anything."

She raised her head and looked at him.

"I was," she said earnestly; "I was everything! Promise me you'll care for me."

He took a step toward her, drawn by the tempestuous soul of her. But he stopped back, his lips parted, her great eyes hung and compelling, her hand raised warningly.

"We ain't boy and girl any more," she said firmly.

Then once again she was gone, and the great gaunt shadows flickered on the wall against which the old violin hung pitifully alone and soundless. And, not until the shadows had crept into the dark was dark and cold did Boy climb the ladder to his rush bed.

CHAPTER XXIII.

The Fire Circle.

White splashes of foam dinned and layed on the slate-blue waters. A hundred yards out from the rushes the water was clear, the yellow sand-bar beneath, between the sand-bar and the rushes lay the wild cypress bed. Here, succulent and sweet-scented, grew the wild-hunted, fear-haunted foal of the Wild, gripped the cozy mud below. With the lowering of the late afternoon skies, a pair of canvas-backs came slinking across the yellow marsh high over the sunken bog and tangled marshland toward the white beaten path. Weary from the flight, lean and nerveless, with dread of hidden dangers, and hungry from long fasting, their glistening wings beat the buffeting west wind a mile or more at sight of the long dark streak of light in the centre of the bay. There, at last, was rest; food, shelter, warmth, perhaps. So when the birds alighted on the path, he sprang forward to meet them. Then he puffed for the torrent of incoherent profanity, cursing his trap-bait. Without, all was silent as the grave. Only the turkey-thief beat his wings to tremble.

"Outside that," he called, "for God's sake, if you be human, speak me."

The wind awoke to greater force, throwing its foam and spray high in the air. Silver spray, an ebony cloud that had been thrown from the schooner anchored half a mile eastward, and which had drifted out into open water. It bobbed and glittered black. Dotting the spray, drifting finally across the yellow shallow of the bar into the calmer water in lee of the long point. The waves had overturned it and it rested bottom up in the wild cypress bed.

The same winds that had wafted him had carried to those frantic sky-worriers settled on the scented wind of the water-plant which they loved, and with drooping wings and joyful, low-voiced quacks they curved to the leaves.

"Inward they sped to the shore, to skirt the wild cypress bed, and by and by, just as day faded, they swerved outward once more on whistling, winged wings. To

"Amos Broadcock," spoke a voice seemingly close beside him, "your Amos has come to you."

"I'm comin' on," begged Amos, "oh, let me out o' here."

"Amos," again came the voice, "we see it's useless to give you time to repeat. The devil has sent us to you for you must have avenged. Which will you have, Amos, rifle-ball or fire? Speak quick."

"Gimme time," groaned the distressed Broadcock, "only gimme time."

Every Girl Who Earns Her Living Read This!

Very complex in her physical relations is every woman, and she must therefore guard jealously anything that would tend to destroy her vitality or health.

Prostitution is of more service to Dr. Hamilton's Pills, and every girl and woman can employ a grand remedy with gratifying results.

As a system tonic and blood restorer, it is not

proper to touch the food with the fingers. However difficult it may be to manage it, it is thought better to put the little forked instrument in the mouth than the fingers.

"There were several salads. These they ate with forks, for it is not

sufficient proper to touch the food with the fingers. However difficult it may be to manage it, it is thought better to put the little forked instrument in the mouth than the fingers.

"The artichokes, asparagus, peas and beans were brought. It was a pleasure to watch them try to eat these with their forks for some, who were less adroit than the others, dropped as many as on their plates and on the way to the mouth as they were able to get to their mouths.

"Afterwards a great silver basin and a pitcher of water were brought, and the guests washed their hands, though it seems as if there would not be much scent of meat and grease on them, for they had touched their food only with those forked instruments."

ped from without and closed it effectually. With the arrival of a trap and his heavy ax he sought the bars of his prison. But his efforts to break down those walls were vain. They were too strong built to topple, though he had broken his nose in the process.

Then he puffed for the torrent of incoherent profanity, cursing his trap-bait. Without, all was silent as the grave. Only the turkey-thief beat his wings to tremble.

"Outside that," he called, "for God's sake, if you be human, speak me."

The wind awoke to greater force, throwing its foam and spray high in the air. Silver spray, an ebony cloud that had been thrown from the schooner anchored half a mile eastward, and which had drifted out into open water. It bobbed and glittered black. Dotting the spray, drifting finally across the yellow shallow of the bar into the calmer water in lee of the long point. The waves had overturned it and it rested bottom up in the wild cypress bed.

Collars as Neck Stretchers

Burmese Women Measure Beauty by Length of Neck.

People of collaring lands pretend it worth while to adopt the present style among the Burmese women of the Padung tribe.

The Burmese collar, made of brass rings, should be made during the summer, and should be well polished, and by and by, just as day faded, they swerved outward once more on whistling, winged wings. To

"Amos Broadcock," spoke a voice seemingly close beside him, "your Amos has come to you."

"I'm comin' on," begged Amos, "oh, let me out o' here."

First Use Of Forks

Royal Guest Gives Account of Dinner In 1574.

Forks first came into use in 1574, at a dinner given by Henry III of France. Here is an account by a Royal lady guest: "The guests never touched the meat, with their fingers but with forks, which they carried to their mouths, bending their necks and bodies over their plates.

"There were several salads. These they ate with forks, for it is not

sufficient proper to touch the food with the fingers. However difficult it may be to manage it, it is thought better to put the little forked instrument in the mouth than the fingers.

"The artichokes, asparagus, peas and beans were brought. It was a pleasure to watch them try to eat these with their forks for some, who were less adroit than the others, dropped as many as on their plates and on the way to the mouth as they were able to get to their mouths.

"Afterwards a great silver basin and a pitcher of water were brought, and the guests washed their hands, though it seems as if there would not be much scent of meat and grease on them, for they had touched their food only with those forked instruments."

ped from without and closed it effectually. With the arrival of a trap and his heavy ax he sought the bars of his prison. But his efforts to break down those walls were vain. They were too strong built to topple, though he had broken his nose in the process.

Then he puffed for the torrent of incoherent profanity, cursing his trap-bait. Without, all was silent as the grave. Only the turkey-thief beat his wings to tremble.

"Outside that," he called, "for God's sake, if you be human, speak me."

The wind awoke to greater force, throwing its foam and spray high in the air. Silver spray, an ebony cloud that had been thrown from the schooner anchored half a mile eastward, and which had drifted out into open water. It bobbed and glittered black. Dotting the spray, drifting finally across the yellow shallow of the bar into the calmer water in lee of the long point. The waves had overturned it and it rested bottom up in the wild cypress bed.

The same winds that had wafted him had carried to those frantic sky-worriers settled on the scented wind of the water-plant which they loved, and with drooping wings and joyful, low-voiced quacks they curved to the leaves.

An "Adamless" Eden

Males Have Been Excluded From South Sea Island.

There is a nearly Edenic Eden in the South Seas—an islet on which a girls' school has been established, in charge of a lady missionary, and from which males have been excluded with the exception of one individual who esteems it a privilege to act as "hewer of wood and drawer of water" for this maiden community.

The girls numbering between seventy and eighty, are from the best native families on the Ellice and Union Islands, and the islet on which the girls' school is located is the headquarter of the London Missionary Society.

Miss Jolliffe, the London Missionary Society's representative, in the Ellice Islands, who is at present in Sydney adds that the curlew bell rings nightly on the islet at nine o'clock.

Mackenzie Oil Fields

Ottawa Giving Close Attention to Whole Situation.

Following suspension of regulations governing petroleum and natural gas on the northwest, the government is to give close consideration to the whole situation in regard to the oil fields of the MacKenzie.

Various representations in this regard have been made. One that initiated a permitting private individuals to locate claims, the oil fields should be developed as a national enterprise thus ensuring that full control of output would be kept within Canada.

There is also the question of decision of creating some more appropriate form of government for the district in view of an anticipated rush of prospectors when the ice breaks up. In view of the world shortage of oil, proper development of the Mackenzie fields is regarded as of the greatest importance.

A Source of Wonder.

Canada's foreign commerce never ceases to be a source of wonder. Think of a population of less than 10,000,000 doing a foreign business of \$2,600,000,000 during the last twelve months!

"Conditions are changing. It is

the best equipped ones who make good now!"

Pulp Mill At Nelson.

A number of capitalists have been interested and arrangements are being made for the erection of a large pulp mill, at the probable cost of two million dollars, in the vicinity of Nelson, British Columbia. An eminent consulting pulp and paper engineer has just reported the existence of a large area of timber suitable for pulp making.

Arrived at the trap, he walked around it until he approached it. It was a wild, penetrating note which he and all the Bushwhackers had learned in their initiation into the secret society.

"Enter," he growled. "Just your luck, Amos."

"He got up and moved forward cautiously. Lowered down was trap number 4087, the one he had approached it with.

"Enter," he growled. "Just your luck, Amos."

"He got up and moved forward cautiously. Lowered down was trap number 4087, the one he had approached it with.

"Enter," he growled. "Just your luck, Amos."

World Happenings Briefly Told

The Supreme Allied Council have agreed that German disarmament must be complete by March 1.

The Government announces that the vacant portfolio of the Secretary of State will not be filled for some time.

The Federal Government is giving close consideration to the oil situation in the Mackenzie River district.

Ottawa doctors are urging the Government to make vaccination compulsory to stop the spread of smallpox.

The United States was declared to rank ninth among the nations of the world in the general education level of its people.

Wm. Webb, aged 88, a Crimean War veteran, who took part in the siege of Sebastopol, is dead at his home in Palmerston.

Toronto has voted a second \$30,000 for unemployed relief, \$30,000 for sick children's hospitals and an increase in salary of the mayor of \$2,500.

The British Government has decided to send only 1,000 men to New Zealand as immigrants, instead of 4,000 as originally intended.

The London Times says that the treaty with the Soviet is a complete surrender on the part of the Government to Soviet sentiments.

The London Morning Post calls attention to the fact that one of the newly-created baronets was proposed during the war for food hoarding.

By the increase in manufacturing the minister of labor, Hon. Gideon Robertson, states that unemployment will cease to give any worry after March next.

Hon. J. E. Caron, minister of agriculture for Quebec, announces that it was the intention of the Government to establish demonstration farms in every county of the province.

In order to put the Manitoba telephone system on a paying basis, the Government will ask the public utilities commission to permit an increase of from ten to fifteen per cent in rates charged.

Germany refused passports for two dye experts who were to join the staff of Du Pont Companies in the U.S. on the ground that German industry would suffer if expert dye workers were allowed to leave.

Completing a circuit of over 5,000 miles, a telephone conversation from Ottawa to Vancouver, has been held. The circuit was connected through Ottawa, New York, Chicago, Denver, Salt Lake, San Francisco, Seattle and Vancouver.

General John W. Stewart, managing director of the Foley, Welch and Stewart Construction Co., of Vancouver, has been awarded contracts on the Gold Coast, British Africa, for the construction of over £17,000,000 worth of railroads.

"My Back Is So Bad"

PAINS in the small of the back, lumbago, rheumatism, pains in the limbs all tell of defective kidneys.

Polyps are being left in the blood which cause pains and aches.

The kidneys, liver and bowels must be aroused to action by such treatment as Dr. Chase's Kidney Liver Pills.

There is no time for delay when the kidneys go wrong, for the development and conduct of the nervous and bright diseases are the natural result.

One pill a dose, 25 cents a box, all dealers or Remington, Bates & Co., Ltd., Toronto.

**Dr. Chase's
Kidney Liver Pills**

W.N.U. 1253

The "Crucifix Fish"

Natives of West Indies Regard it With Superstition.

Throughout the West Indies the "crucifix fish" is regarded with a mixture of superstition and reverential awe by the natives who throw specimens, caught in their nets, back into the sea and cross themselves when they come upon the skull of one. The dried skeleton of this fish shows plainly on the under side of the skull the figure of a man on a crucifix with a halo about the head. On the other side of the skull is a figure of a monk with cowl bending before an altar.

Heart Disease Relieved In 10 Minutes.
—Aguayo's Remedy for Heart gives perfect relief in ONE MINUTE to those suffering from Palpitation, Spills, Pain in Heart, Breathing Spells, Pain in Left Side, and all symptoms of a diseased heart. One dose cures.

Clover Seed Crop.

It is estimated that the clover seed crop in the Dryden district for 1920 will total 4,000 bushels, which at the present market value will amount to \$600. The bulk of the clover seed grown in this district is sold to the government for seed purposes.

State of Ohio, City of Toledo, Lucas County, State of Michigan, Frank T. Cheney makes oath that he is doing business in the City of Toledo, State of Ohio, and that he will pay a sum in ONE HUNDRED DOLLARS for any case of Cancer that can be cured by the use of HALL'S CATARACH MEDICINE.

Swear to before me and subscribed to my presence, this 6th day of December, A. D. 1920.

(Signed) A. W. Gleason, Notary Public.

HALL'S CATARACH MEDICINE is taken internally and externally. It cures the Surface of the System. The Drugs, 75c. Testimonials free. F. J. Cheney & Co., Toledo, Ohio.

Sinn Fein and German Plots

Mary McSwiney Quite Candid In Her Testimony Before the Villard Committee.

Miss Mary McSwiney, sister of the late Lord Mayor of Cork, was quite candid in her testimony given before the Villard Committee at Washington two or three weeks ago. Speaking of the uprising at Dublin at Easter, 1916, she said, according to the official report of her evidence:

"We expected help in this insurrection. We expected arms. We had very few arms at that time. We were expecting Roger Casement to come from Germany with arms. I have no hesitation about acknowledging that. We were at war with England, and we were at liberty to get guns where we could, to carry on that war. England said she was fighting for the rights of small nations. We had absolutely as much right to our liberty as Belgium had, whose rights England was so solicitous. If we wanted to take Germany as an ally we had a right to take her as an ally."

—Toronto Globe.

Don't waste time finding fault with yourself; that's what your friends are for.

"Teeth of time" are the ones the dentists supplies.

Minard's Liniment For Garter Cows.

Soldier Settlement Figures.

According to figures supplied by the Soldiers' Settlement Board the total area of land taken up by returned men the west is approximately 3,100,000 acres. Of this about 2,000,000 acres are free lands granted to veterans of whom 8,192 have availed themselves of soldiers' grants under the act. Settlers to the number of 2,900 have repaid their loans in full.

The Mass book used in Iceland has been revised, and everything suggesting women's inferiority to man has been omitted.

"Oral Hygiene" Lay Education Series "FILLINGS"

A filling is a repair in a tooth. There are many kinds of filling materials. Each one has some special quality that causes it to be selected for a certain cavity.

A cavity is a hole in a tooth usually caused by caries, which is decay of the teeth. To prepare a cavity for filling, the dentist must remove all decay and all of the tooth structure that has been invaded by decay. If a tooth could be successfully filed by simply removing the actual decayed portion and then placing the filling, the job would be a very easy one, both for the patient and the dentist.

The hard part of a tooth, you know, is composed of enamel and dentine. The dentine is similar to bone and has a great many little tubes called tubuli, running from the pulp canal in the centre of the tooth to the outer surface of the dentine just inside of the enamel. These tubes are of decay within the cavity. To receive a filling that will stay, this infected dentine must be cut away. Then the cavity must be given shape that will give the fillings as much support as possible, that will allow the filling to protect the margins of the enamel, and that will retain the filling in the tooth.

Even a small cavity will have a much larger area of infected dentine than you would imagine. If you follow your teeth to decay until you can find the cavities yourself, the chances are that the pulp or nerve, as it is incorrectly called, will become inflamed. Then there is real trouble. The cavity is a small one, because if there has been very little destruction of the tooth there has been very little loss of contour and of strength, and most important of all, where the cavity is small the pulp is safe. Do not neglect your teeth until large fillings are necessary.

Then there is real trouble. The cavity is a small one, because if there has been very little destruction of the tooth there has been very little loss of contour and of strength, and most important of all, where the cavity is small the pulp is safe. Do not neglect your teeth until large fillings are necessary.

Then there is real trouble. The cavity is a small one, because if there has been very little destruction of the tooth there has been very little loss of contour and of strength, and most important of all, where the cavity is small the pulp is safe. Do not neglect your teeth until large fillings are necessary.

Then there is real trouble. The cavity is a small one, because if there has been very little destruction of the tooth there has been very little loss of contour and of strength, and most important of all, where the cavity is small the pulp is safe. Do not neglect your teeth until large fillings are necessary.

Then there is real trouble. Of Local and General Interest

It will cost about \$1,700,000 to take the next census in Canada.

Blairmore's building programme for 1921 will not be less than \$50,000.

Senator Mar Poy returned on Saturday from a business visit to Calgary.

A good roads convention was held at Penticton, B.C., on Monday and Tuesday of this week.

Natasia Bros., formerly of Passburg and Coleman, have started in the bakery business in Blairmore.

FOR SALE AT A SNAP—Good as new Edison Diamond Point Cylinder Phonograph Apparatus to The Enterprise.

California is not in it with Blairmore. Butterflies and caterpillars were sky-larking around the footlights at the opera house on January the 29th.

Fernie trustees have decided that graduates from Fernie schools, whose parents reside in the town, must not be employed as teachers in Fernie schools.

Both the Baptist and Presbyterian churches at Cranbrook are having their troubles getting pastors. The latter has been without a resident pastor for almost a year.

At the recent meeting of the provincial retail merchants, held in Calgary, W. A. Fraser, of Pincher Creek, was unanimously chosen president of the Provincial Retail Merchants' Association.

Blairmore's senior hockey team whipped the Pincher Creek team to the tune of 9 to 2 on Friday night last. Pincher boys are sports and acknowledge that Blairmore hands out the best game of the league.

Trail News—Mrs. F. W. Doubt returned from Vulcan, Alberta, where she was called by the death of her brother. She was accompanied by her son, W. F. Doubt and Miss Lydia Doubt who have been visiting their sister at High River.

W. A. Hunter has resigned the principship of the Pincher Creek high school, to take effect at Easter. Mr. Hunter intends taking a special university course at Chicago to equip himself for work in Trinidad, and will move his family temporarily to Chicago.

Messrs. G. K. Sirett and Dave Walker, of Bellevue, have secured the contract for painting and decorating the Bellevue school. Mr. Sirett is a returned veteran and has had considerable experience in the painting and decorating line in different parts of eastern Canada before coming west. Dave is now attached to the "old soul" of the Crows' Nest Pass and is well known. At present they are working on several house and office decorating contracts in Blairmore.

A wedding will take place at Bellevue on Saturday morning. Celebration of the event will commence immediately after the ceremony and continue until possibly the middle of next week, provided the bride's dancing pins hold out till then. The most trying time in a Slay girl's life is the first two or three days following the fateful knot. She is obliged to dance with every man who has a five spot to spare and kiss every other who has a larger amount, and so is raised the wherewithal to furnish the home.

One of the biggest feasts performed at the Lethbridge game last night was the successful checking of little Tony Vepravsky, the seventeen-year-old idol and mascot of the Blairmore team by a combined effort of three husky groupings of the Lethbridge team, that was some pluck!

The regular meeting of the town council will be held on Monday next.

George Selock, an 18-year old Austrian, suicided at Lethbridge on Wednesday morning.

The regular meeting of the local branch of the T.O.D.E. will be held on Tuesday next.

"A fan at the rinkside is worth three hundred outside the gate," So say Lethbridge citizens.

Lethbridge Bachelors will be decked at their annual dance at the opera house on the night of Tuesday, February 15th.

The marriage of Albert Sullivan to Mrs. Annie Heywood was solemnized by the Rev. W. T. Young on Saturday last.

A fast game of hockey is in store for fans on Saturday night, when the Calgary Crescents meet Coleman Juniors on the Coleman rink.

Minerva Chapter, O.E.S., will give a dance at the Coleman opera house on the night of February 11th, for which invitations are being issued.

When the Lethbridge hockey got after little Tony Vepravsky, women with infant children in arms sought shelter. Who'd blame them?

Owing to unfavorable ice conditions, the hockey game between Taber and Blairmore, scheduled for this Friday night, will likely be postponed for a week or so.

Lethbridge show their calibre when they protest a game won by Coleman on Lethbridge ice, where chances of winning on ice were two to one in favor of the home team. Sure, Coleman won that game and can win it again, provided Lethbridge plays their original team.

After a long, long sleep, Lethbridge with its boastful population of twelve or fourteen thousand people, has decided that they MAY support a closed in rink. One of the first steps to be taken towards this is to develop a proper sporting spirit, which up to the present has not to any extent been manifested in Lethbridge. With the proper sporting spirit comes the notion to be liberal towards support.

Less than one tenth of Lethbridge's population took it in their heads on Wednesday night, to seek out the heard-of-rink, the first time in the history of that city that a crowd of over a thousand gathered together to encourage their boy sports. Out of seven Lethbridge citizens approached by visiting Blairmoreites, only one could give any idea of the whereabouts of the rink.

Such a remark as "Hit him on the head with your revolver" coming from one in charge of those performing police duties, does not speak well for a civilized community; but such a remark was heard at Lethbridge when Passites, who had travelled one hundred miles and paid full admission to the Lethbridge rink, demanded admission from a couple of subordinate police officers who guarded the entrance.

A number of friends gathered at the home of Mrs. D. Kamp on Friday evening last, to spring a surprise on Miss Jane Kamp on the occasion of her birthday. About twenty young people were present and engaged in various forms of merriment until midnight, when a dainty luncheon was served. The table was adorned with a huge, gaily decorated birthday cake. Among those present were Misses L. Turner, E. McLeod, F. Warner, V. Warner, E. Gibson, G. Macdonald, L. Evers and M. Kamp; and Messrs. A. McLeod, Teddy Mots, C. Howe, N. Ashe, Mr. Bart, J. Jarvis, F. McLeod, W. Randal and others.

Following the big return hockey match between the Scrubs and Parasites at Bellevue on Tuesday night, the hockey boys and girls were entertained at luncheon and dance by the good ladies of Bellevue.

We are glad to learn that the Rev. Father Cosman, who a few weeks ago underwent a rather critical operation at Calgary, is rapidly on the mend. He is still in the hospital and it will be some time yet before he will be in condition to resume his duties here.

Preliminary Announcement

The Ladies of the Anglican church, Blairmore, are holding a grand bazaar and masquerade ball on the afternoon and evening of April the 19th. See bills later.

Anglican Church

Services next Sunday will be held at Blairmore at 7:30 p.m., and at Coleman at 11 a.m., conducted by Major the Rev. H. Walker, the future incumbent of this parish.

A Challenge

The Blairmore Junior Hockey team issue a challenge to the big Lethbridge Senior team to play real hockey on Blairmore ice. Conditions are that every man of the Lethbridge team must have been a resident of Lethbridge for a period of not less than six months and been in steady employment earning at least the price of his meal tickets during that time; that each member of the team must be in possession of an up to date automobile and that each player remain on the ice while his physical and mental condition will permit. The team is to be brought to Blairmore by special train and be accompanied by at least three hundred fans who have paid the regular fare. Lunch will be served in Blairmore at a price to Lethbridge pocket—15c.

After a long, long sleep, Lethbridge with its boastful population of twelve or fourteen thousand people, has decided that they MAY support a closed in rink. One of the first steps to be taken towards this is to develop a proper sporting spirit, which up to the present has not to any extent been manifested in Lethbridge. With the proper sporting spirit comes the notion to be liberal towards support.

Less than one tenth of Lethbridge's population took it in their heads on Wednesday night, to seek out the heard-of-rink, the first time in the history of that city that a crowd of over a thousand gathered together to encourage their boy sports. Out of seven Lethbridge citizens approached by visiting Blairmoreites, only one could give any idea of the whereabouts of the rink.

Such a remark as "Hit him on the head with your revolver" coming from one in charge of those performing police duties, does not speak well for a civilized community; but such a remark was heard at Lethbridge when Passites, who had travelled one hundred miles and paid full admission to the Lethbridge rink, demanded admission from a couple of subordinate police officers who guarded the entrance.
